**Disclaimer:** This Procedural Payment Guide for Transcatheter Arterialization of the Deep Veins (TADV) provides coding and reimbursement information for physicians and healthcare facilities. The codes included in this guide are intended to represent typical TADV procedures. However, these coding suggestions do not replace seeking coding advice from the payor and/or your own coding staff. The ultimate responsibility for correct coding lies with the provider of services. Please contact your local payor for interpretation of the appropriate codes to use for specific procedures. LimFlow makes no guarantee that the use of this information will prevent differences of opinion or dispute with Medicare or other third-party payors as to the correct form of billing or the amount that will be paid to providers of service.

## Important Safety Information:

**LimFlow System Intended Use/Indications for Use:** The LimFlow System is indicated for patients who have chronic limb-threatening ischemia with no suitable endovascular or surgical revascularization options and are at risk of major amputation. **Contraindications:** Patients with deep venous thrombus in target vein; Patients with uncorrected bleeding disorders or patients who cannot receive anticoagulation or antiplatelet aggregation therapy. **Warnings and Precautions:** Use in patients with concomitant hepatic insufficiency has not been evaluated; Use in patients with poor cardiac output, e.g., NYHA Class IV, has not been evaluated; Use in pregnant and breastfeeding women has not been evaluated; Implanting the device in the distal half of the calcaneus may result in stent fracture. **Adverse Events:** Acute renal impairment requiring dialysis; Cardiac arrest, Death, Embolization, Graft rupture, trans-graft leak, site leak; Hematoma; Insufficient blood flow to foot; Ischemia; Myocardial infarction; Occlusion; Pain; Peripheral edema; Procedural bleeding; Restenosis of stented segment; Sepsis / Infection; Stent damage, implant migration; Stent graft fracture; Stent graft misplacement, deformation, or migration; The need for surgical or endovascular interventions to rectify an access site problem; Thrombosis; Vessel dissection, perforation, injury; Vessel spasm. Please reference product Instructions for Use for more information regarding indications, warnings, precautions, contraindications, and adverse events. **LimFlow ARC Intended Use/Indications for Use:** The LimFlow ARC is intended to facilitate placement and positioning of guidewires and catheters within the peripheral vasculature. The LimFlow ARC is not intended for use in the coronary or cerebral vasculature. **LimFlow V-Ceiver Intended Use/Indications for Use:** The LimFlow V-Ceiver is intended for use in the cardiovascular system to manipulate and retrieve guidewires specified in the IFU. **LimFlow Vector Intended Use/Indications for Use:** The LimFlow Vector is intended for the treatment of vascular disorders and more particularly for excising or disrupting venous valves.

Important Information: Prior to use, refer to the Instructions for Use for indications, contraindications, suggested procedure, warnings, adverse events, and precautions.

**Caution:** Federal (USA) law restricts these devices to sale by or on the order of a licensed healthcare practitioner.
